

Johan George

CS Student | Software Development | Technical Problem Solving

Experience

Projects

Java Game Capstone Project

- Built a multi-class Java app with Player, Level, Inventory, and Projectile systems
- Fixed runtime errors by setting classpaths and resource loading
- Organized files into clear modules for easier updates
- Ran the app through the Java CLI with the right environment setup

Wedding Seating Chart Web App

- Built a responsive tool to search guest names and show table numbers
- Created a simple mobile layout for event use and QR code entry
- Implemented efficient search functionality using JavaScript for real-time guest lookup

CSV Order Processing Program

- Wrote a Python script to read order files and calculate totals
- Used functions to keep the code clear and easy to follow
- Produced a clean summary for quick review

Password Strength Checker

- Built a Python tool to rate password strength by length and character mix
- Added checks for upper- and lowercase letters, numbers, and symbols
- Gave helpful tips to make passwords stronger

United States Marine Corps

Engineer Equipment Electrical System Technician

June 2023 – Present

- Solved electrical and mechanical issues that cut downtime by 20%
- Ran diagnostics and circuit checks to fix equipment problems
- Taught others how to operate and care for equipment
- Worked in fast-moving settings that needed quick problem-solving

United States Marine Corps Reserves

HVAC Technician

June 2023 – Present

- Set up and serviced HVAC systems for steady performance
- Boosted system output through careful checks and repairs
- Kept all work in line with safety rules

Summary

Computer Science student with a strong foundation in Java, C++, Python, HTML, CSS and JavaScript and strong technical troubleshooting experience from the United States Marine Corps. Skilled in problem-solving and working under pressure. Seeking internship or entry-level opportunities in software development or QA.

Technical Skills

Languages: Java, C++, Python, HTML, CSS and JavaScript

Tools: VS Code, Git, GitHub, Claude

Concepts: Object-Oriented Programming, Debugging, Problem Solving

Education

De Anza College – Computer Science

Admitted: SJSU (CS) & UCSB (Data Science) – Fall 2026

Homestead High School

Diploma: 2022

Certifications

- Java 17 Masterclass (Udemy)
- Learn C++ (Codecademy)
- Learn JavaScript (Codecademy)
- Unreal Engine Fundamentals (Coursera)
- EPA 608 Type I and II
- Claude 101 (Anthropic)
- Getting Started Off-Platform for Data Science (Codecademy)
- Excel: Data Analysis with Formulas/Functions and PivotTables (Coursera)
